

Amendments to the Specification:

Please replace original paragraph **[0002]** with the following replacement paragraph:

[0002] Various types of loading devices are known, e.g., in the form of farming tractors, logging tractors or industrial tractors with a front loader or rear loader that is constructed in the form of a wheel loader or the like. The operation of these loading devices is quite complex because the base vehicle needs to be driven and steered while the loader frequently needs to be operated simultaneously.
